The closest prior art of McCoy (U. S. The display arrangements of the multimedia sequences are varied and customized by each downlink facility using the control information in order to better inform and entertain viewers.

In regarding to independent claims 1, 17, 23, 39 and 47, McCoy taken either individually or in combination with other prior art of record fails to teach or suggest simultaneously distributing a plurality of the registered content items when selected by a plurality of content purchaser, and determining whether the additional content item can be registered for distribution by determining if there is a conflict between the distribution parameters of the additional content item and distribution parameter of previously registered content items.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
